
1. Use an Existing Account in ZeptoMail

If you don't already have a ZeptoMail account, sign up at [ZeptoMail](#). If you already have an account, log in to your dashboard.

2. Generate the **SEND_MAIL_TOKEN**

The **SEND_MAIL_TOKEN** is an authentication token used by ZeptoMail to allow your Laravel application to send emails. To generate this token:

1. Go to the "API Keys" section in the ZeptoMail dashboard.
2. Click "Generate API Key."
3. Copy the generated token. This will be your **SEND_MAIL_TOKEN**.

Important Note: Save this token in a secure place because you won't be able to retrieve it later. If you lose it, you'll need to generate a new one.
